

See polar bears in the Arctic Refuge this fall! Join Trustees for Alaska and Akook Arctic Adventures for a trip of a lifetime September 20 – September 24, 2019

Observing wild polar bears in their natural habitat is truly a remarkable experience. Now, you

can join a trip exclusively offered by Trustees for Alaska this fall.

During the four-day trip, Staff Attorney Bridget Psarianos will take you to see the Arctic's most enigmatic and endangered species. The bear-viewing adventure will be based in Kaktovik, an Inupiaq village nestled along the Beaufort Sea within the Arctic National Wildlife Refuge.

Akook Arctic Adventures will provide guides. Its owner Jack Kayotuk grew up in the Arctic and works with Steven

Our trip will launch from Fairbanks, where we will meet for dinner. The next day you will fly to Kaktovik and settle into the Waldo Arms Hotel. After lunch, you will go on the first boat trip to see bears. Later you'll meet up for a family-style dinner and share your photos and first impressions. You'll also have opportunities for in-depth discussions of how climate change affects these predators. Over the next two and a half days, you will go on four more four-hour boat trips to see Alaska's iconic polar bears. You will also have time to stroll around the village and meet with U.S. Fish and Wildlife staff.

The trip includes lodging, meals, transportation, tour guides and flights to and from Fairbanks, Alaska. Lodging, meals, and transportation to and within Fairbanks—and the guide's tips—are not included. The group is limited to five people.

When: September 20 – September 24, 2019

Where: Kaktovik, Alaska

Cost: TBD, but approximately \$5,300 round-trip from Fairbanks, Alaska

Who: Trustees for Alaska, http://www.trustees.org/

Akook Artic Adventures, http://www.akookarcticadventures.com/

For more information, please contact Vicki Clark at (907) 433-2010 or vclark@trustees.org.

About polar bears: The polar bear is the world's largest carnivore, and its favorite prey is the ringed seal. They often capture seals by waiting at breathing holes. They live most of their lives at sea, staying close to the pack ice and using it as a platform for hunting. In September and early October, the bears congregate along the coast and in the protected lagoons of the Arctic National Wildlife Refuge.
